

The RED stamp **DTS-120 Digital Tax Stamper** will accommodate most standard carton product sizes including 72's to 120's, and is capable of extended size ranges for future carton designs. Throughput rates are high to ensure maximum machine productivity.

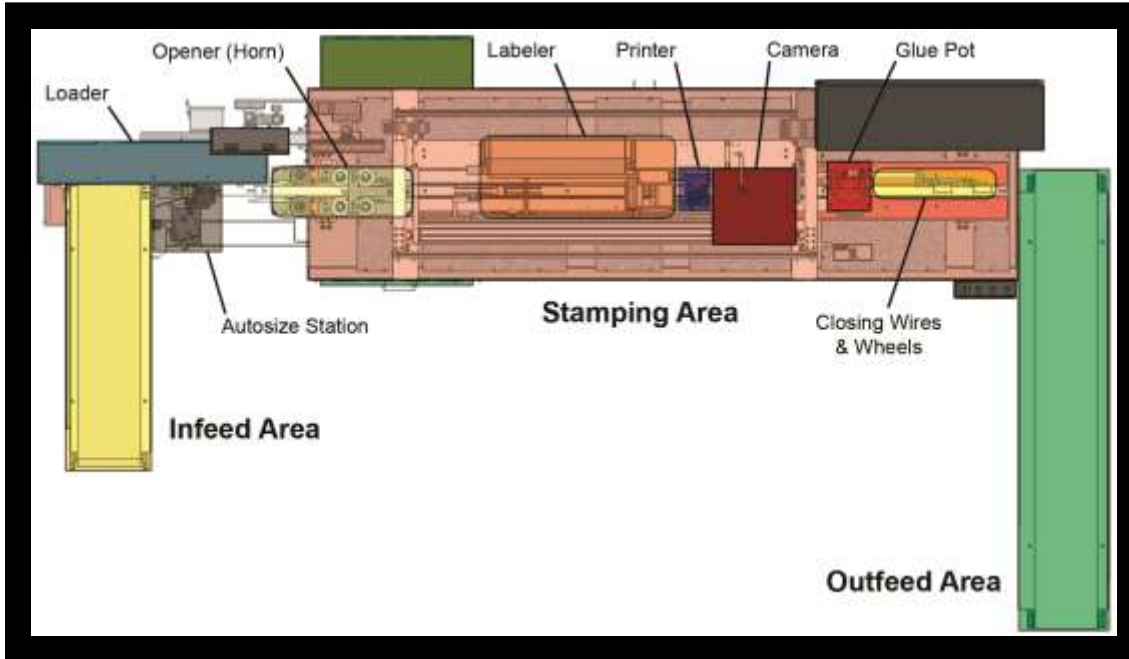

The RED Stamp **DTS-120** fully supports track and trace programs. Track and trace programs are used to confirm stamp application on legitimate products.

FEATURES

- Heavy-Duty Construction.
- Anodized aluminum Components.
- Smooth, Stable and Precise Motion Component Designs.
- Precision Controlled Glue Bead Application.
- Quick Release Cover.
- High Speed Processing.
- High Speed Servo Positioning.
- Alarm Messages.

The RED Stamp **DTS-120 Digital Stamping machine's** components are designed for modularity: Allowing for flexibility in system layout, to suit your facility's space requirements. All RED Stamp Stamping Machines are comprised of two basic functional areas: In-feed Conveyor and Stamping Area, with options available for machine out-feed.
